

GULSHAN ASLAM

Final-Year Software Engineering Student
gulshan.work0001@gmail.com | Lahore, Pakistan | github.com/Gul432

PROFILE

Final-semester Software Engineering student (BS, University of Management and Technology) with hands-on experience across the full development cycle in Python and C++. Comfortable applying core data structures, algorithms, and database design to build working end-to-end systems, from NLP-driven backends to multiplayer game servers. Quick to pick up new stacks, collaborate in a team, and take feedback through code review.

SKILLS

- Languages & Fundamentals: Python, C++, Data Structures & Algorithms, OOP
- Backend & APIs: FastAPI, HTTP server design, REST principles
- Data & ML: Scikit-Learn (NLP pipelines, intent classification)
- Databases: PostgreSQL, MySQL, SQL schema design
- Tools & Practices: Git/GitHub, Digital Ocean deployment, problem solving, client & team communication

PROJECTS

Cognitive Workflow Assistant

- Built a smart task-management system with FastAPI, using a Scikit-Learn NLP pipeline for intent classification and PostgreSQL for structured storage.

Online Bingo Game — Final Year Project

- Developed a multiplayer game in the Godot engine backed by a custom HTTP-based Python server and PostgreSQL database, deployed on Digital Ocean.

EDUCATION

BS Software Engineering — University of Management and Technology (UMT), Lahore

Nov 2022 – Present (Final Semester)

F.Sc (Pre-Medical) — Aspire College, Chunian

May 2020 – Aug 2022
